Honors U.S. Government Syllabus- Modified from KSDE HGSS Syllabus

Course Description

The high school government course builds upon and adds to students' previous learning of history, government, economics, and geography to assist them in becoming truly informed, thoughtful, and engaged citizens in a democracy. The course should be rigorous and relevant with instruction that integrates thinking skills, historical processes, and content so that students are able to apply the learning to their own lives. Instruction should include the integration of concepts and principles from history, economics, geography, civics, and the humanities.

Connecting with Past Learning

Students should come to the United States Government course with a foundational knowledge of the story of how the United States came into being and developed a government based on the principles laid out in the Declaration of Independence. The basic structure of the government, including the three branches, separation of powers, and checks and balances should already be part of their background knowledge. In world history, they will have learned about the Enlightenment's influence on both the structure and principles of the American government. The narrative of the United States and world history will have introduced the student to the concepts of democracy and totalitarianism, the interaction of government and the economy, and the struggle for human and civil rights that has occurred throughout history. Students should possess a general understanding of Kansas and its geography, symbols, industry, and culture, and identify with a community or region of the state. They should have basic geography skills and an awareness of the different regions of the United States and the world. They should have experience with the Effective HGSS Classroom Practices of the Kansas standards and should be aware of the discipline's ways of thinking or habits of mind.

Connecting with Future Learning

While a small percentage of students will pursue the post-secondary study of political science at the university level, most will not continue to study American government after high school. But they will participate in society as informed, thoughtful, engaged citizens and voters. Students should leave high school equipped with the ability to better understand the complex domestic and international issues which will directly and indirectly impact their lives and assist them in making decisions as individuals and citizens. Students should be able to link learning in this class to future learning as they fuse experience, knowledge, and reasoning to understand, identify, and solve problems.

Culturally Relevant Pedagogy

Culture is central to learning. It plays a role not only in communicating and receiving information, but also in shaping the thinking process of groups and individuals. Instructional designs that acknowledge, respond to, and celebrate fundamental cultures offer a full and equitable access to education for

students from all cultures. Culturally Relevant Teaching is a pedagogy that recognizes the importance of including students' cultural and experiential references in all aspects of learning.
